31.10.2018

Venue: Dr. A.P.J. Abdul Kalam Auditorium, JIPMER

In view of

GLOBAL HANDWASHING DAY 2018

Clean Hands – a recipe for health

Organized by

Department of Nursing
in association with
Hospital Infection Control Committee
JIPMER, Puducherry

We are pleased to announce that Hospital Infection Control Committee (HICC), JIPMER is conducting the “1st National Conference on **“Nurses Role in Hospital Infection Control”** targeting nurses from different parts of the nation on **31st October 2018** at JIPMER, Puducherry.

Jawaharlal Institute of Postgraduate Medical Education and Research, Puducherry (JIPMER) under Government of India since the year 1956, is one of the leading Medical Institutions of India. Spread over a sprawling about 192.2-acre campus in an urban locale of Puducherry (formerly Pondicherry).

JIPMER has been declared as an Institution of National Importance by a Parliamentary Act, i.e. JIPMER, Puducherry, Act, 2008.

JIPMER imparts Undergraduate (UG), Postgraduate (PG) and Super speciality Medical Training through a working hospital (JIPMER Hospital) with a bed strength of 2137 and a Nursing College. Degree Courses are offered in 32 various disciplines.

The Department of nursing is one of the essential backbone of strengthening services in patient care delivery. The motto of our hospital “Veritas Curat” (Truth Cures) keeps the Nursing Community on their toes and needless to say, their work has regarded as the epitome of nursing care in the history of JIPMER hospital.

Nursing service is an integral part of JIPMER, which aims at high quality nursing care to patients and community, along with JIPMER quality council team and other members of allied disciplines in the hospital. Our goal is to advance hand in hand with application of Nursing Theories and implementation of advanced interventions (Transplant and robotic surgeries) for enhancing and inclining the current knowledge among nursing personnel’s for delivery of care in global standards to improve our patient care and comfort.

Infection Control is an essential component of any health care delivery system. Implementing infection control measures from simple hand washing to high-level disinfection of surgical instruments can prevent transmission of disease in health care settings. Unfortunately, an effective and robust infection control programme is lacking in most of the hospitals in our country. Nurses play a crucial role in implementing the infection control programmes. This conference aims at educating nurses on various aspects of hospital infection control and prevention and further facilitates them to train others and implement, establish or augment the infection control programmes in their own institutes.

The number of participants selected for the conference will be limited to 300.

OBJECTIVES OF THE CONFERENCE

The nurses will be able to

1. Explain the risk of transmission of blood borne & other pathogens from both recognized and unrecognized sources.
2. Acquire knowledge about the personal protective equipment.
3. Develop knowledge in infection control and prevention measures.
4. Determine the health care facility recommendation for standard precaution
5. Gain knowledge about Needle stick injury management and prevention.

ORGANIZING COMMITTEE

Organizing Chairperson

Ms. Santhi Tamilmani, B.Sc. (N), MBA.,
Officer In-charge Nursing Section,
JIPMER

Dr Apurba Sankar Sastry

Associate Professor,
